

Setting up a Part-15 Micro-Broadcasting Station to Help WOFR.org in YOUR AREA!

What you will need:

SainSonic 0.5W Long Range (10km) Dual Mode Stereo Broadcast Home FM Transmitter with Antenna

Approximately \$70.00

Front Panel

Back Panel

Deva DB90-RX IP Audio Decoder (Receives WOFR.org Broadcasts from your Internet connection without tying up a local PC.)

Approximately \$160.00

6 Foot 3.5mm to Stereo RCA Male Cable

Approximately \$4.00

Total (Without Shipping Costs) Approximately = \$234.00

This configuration will also allow your local church to switch over to your service audio in order to broadcast your own service LIVE to your local area, superceding our WOFR.org regular programming. We encourage you to reach your area with your own services, and broadcast our WOFR.org programming when you are not having services! Together we can minister the Word of Faith to the world!

If you are interested in setting up a micro-broadcast station, DO NOT ORDER ANY EQUIPMENT UNTIL YOU CALL US FIRST!

WOFR.org personnel are available to set up your equipment, and tune it to the proper settings; the cost for this service will vary depending on your physical location, and your location's specific needs (mounting of equipment, site selection, and many other factors.)

Word of Faith Broadcasting, Inc. - Harold Cagle, Jr., President - P.O. Box 101, Newton, NC 28658 - (828) 461-6002
